O’REILLY
CONFERENCE OVERVIEW

THE O’REILLY WHERE 2.0 CONFERENCE explores the emerging consumer and enterprise ecosystems around location-aware technologies—ecosystems that increasingly impact the way we work and play. Location-determining technologies like GPS, RFID, WLAN, cellular networks, and networked sensors enable an ever-growing array of capabilities from local search and mapping to business analytics to enterprise integration, commercial applications, and software infrastructure.

Learn from early adopters and industry leaders how to apply these technologies to your own business. What technologies are real now and what is coming in the near future? What applications can you build with them? What business problems can they solve? What business models open up? Where’s the money? Join us at The Westin St Francis in San Francisco, June 29 – 30, 2005, to explore these questions and more.

O’Reilly conferences bring together forward-thinking business and technology leaders to shape the ideas that influence industries around the globe. For over 25 years, O’Reilly has facilitated the adoption of new and important technologies by the enterprise, putting emerging technologies on the map.
